

Novice Rig Roundup (NRR) 2017 Contest Information

GENERAL INFORMATION

The Novice Rig Roundup (NRR) 2017 contest will last 9 days this year, starting at 0001z on 18 February, 2017 and ending at 2359z on 26 February, 2017. This date range allows the contest to cover two complete weekends.

BANDS: The only allowed bands are *80m, 40m, 15m, 10m, and 2m*, which is in keeping with the Novice level licenses prior to 1980. The online logging program will only allow you to enter from that selection.

POWER: You may operate at whatever *output* power is legal for your license and band, but more points are given to QRP (<=5 watts) or Novice (<= 60 watts) contacts.

FREQUENCY CONTROL: You may use crystal or VFO frequency control, but more points are awarded when you use crystal (XTAL).

MODES: You may operate CW on the allowed HF bands, or AM and CW on VHF (2m), but there is no distinction in points for your chosen mode. The online log does not record mode.

EXCHANGE: Contest exchange should include your rig type as **HB** for home brew, **COM** for commercial (kit or otherwise) that was sold in 1980 or prior. **NON** is for 'non Novice-era' equipment (kits or otherwise) that were sold on or after 1981.

Next report your frequency control method as **XTAL** for crystal or **VFO** for VFO control.

Then comes your power level. Send and receive RST, name, QTH rounds out the list. If you have an **NRR number**, exchange that as well...it MIGHT result in additional bonus points.

Examples: **DE AD4XX 599 HB XTAL 5 WATTS NAME JIM QTH NC**
DE AD4XX 599 COM VFO PWR 10W OP JIM QTH NC
DE AD4XX 599 NON VFO 100W NAME JIM QTH NC

Of course, you can have a much longer QSO if you wish.

LOG SUBMISSION: With very few exceptions (if approved by Bry at nrr@noviceRigRoundup.com), *ALL LOG ENTRIES MUST BE ENTERED IN THE ONLINE LOGGER*. At this time there are no provisions for paper, email, or fax. You may import your ADIF logs from other logging programs if you wish. More information is below.

You can create an account now and practice with the log to get comfortable with it. A day or two prior to the actual contest, all log entries will be deleted so that only real log entries will be considered for scoring. Go to <http://www.noviceRigRoundup.com/nrrLog> to create an account.

The online logger will automatically submit your scores for each category (QRP, NOVICE, and GENERAL), so you do not need to struggle with which score would give you the best chance of a win for a particular category. You can keep up to date on your progress by using the '**My Stats**' button at the top of the log.

AWARDS: Antique style certificate with your score for all entrants. Everyone who submits a log will receive a quality certificate for participation. Special award certificate for highest score in each category.

Novice Rig Roundup (NRR) 2017 Contest Information

SCORE SYSTEM

1. RAW QSO SCORE

Scoring is based on contacts you make during the contest period, and is completely dependent on YOUR station setup, not the configuration or report from the other station. Type of rig, type of frequency control, and output power are the important factors. Raw QSO scoring is as follows:

A. CATEGORY OF RIG

- 3 points (HB): Your radio is home brew (not a kit) of any age.
- 2 points (COM): Any Commercial rigs made BEFORE 1980 plus *ANY intended for NOVICE use only* built between 1980 and 1999.
- 1 point (NON): Your radio is a non-novice era kit or commercial radio

B. FREQUENCY CONTROL

- 2 points (X): Your radio is crystal controlled, any age
- 0 points (V): Your radio is VFO controlled, any age

C. OUTPUT POWER

- 2 points (QRP): Your radio is set to 5 watts output or less
- 1 points (NOVICE): Your radio is > 5 watts and <= 60 watts output
- 0 point (GENERAL): Your radio is above 60 watts output

Each contact you make should be scored on ALL THREE of the above categories. For example, if you used a non-novice radio (1 pt) with VFO control (0 pts) at QRP level (2 points), your QSO score for that contact would be a total of 3.

2. MULTIPLIER

Each unique state, province, or country (with a unique SPC) will be counted as 1 multiplier and your final raw QSO points score from section 1 would be multiplied by this number. For example, if you work Colorado (CO) twice on two different bands, you still only count Colorado once. If you had 30 unique SPCs, and 100 total RAW QSO points, your score with the multiplier would be $30 \times 100 = 3,000$. The online logger verifies that you enter a proper SPC. All recognized SPC codes for NRR 2017 are available at the SKCC web page http://www.skccgroup.com/display_spc_list.php.

3. BONUS POINTS

Once you have calculated your score based on sections 1 and 2 above, you can apply bonus points. You must do steps 1 and 2 BEFORE doing this part of your scoring.

Unique WN and KN novice call signs (2x3 type calls) will be worth 50 bonus points *one time per station, per band (80m, 40m, 15m, 10m, and 2m)*. If you work WN9AAA on 80 meters and 40 meters, you get 100 bonus points. If you work WN9AAA on 80 meters twice, you only get 50 bonus points.

Bonus Points for Novice-Era Rigs are available at 50 points per rig. *This applies to transmitters or transceivers, NOT receivers.* If your rig was designed/built/sold in 1980 or earlier, or it was *intended for NOVICE use only* and built between 1980 and 1999. Example: The HW-99 was sold after 1980 but counts as Novice-era. You must use the rig for at least one QSO. You will NOT receive extra points for

Novice Rig Roundup (NRR) 2017 Contest Information

using the rig on multiple bands. You can use the **'My Station'** button at the top of the log to enter the number of Novice-era rigs (again, not receivers) you use and it will automatically apply the bonus points for the number of rigs you include. You can update the rig count at any time and your score will be updated automatically. There is no way at this time to actually identify the rig description you use in a QSO except for in the 'Comments' field.

Novice Rig Roundup (NRR) 2017 Contest Information

IMPORTING ADIF LOGS

A provision to import your entries from another logger has been added but it will require some special attention to the points outlined below.

- 1 – Only log entries between and including dates of 20170218 through 20170226 will be imported. All other entries in your ADIF log will be ignored.
- 2 – When you import an ADIF log, your previous log entries will all be deleted. It is important that your import includes ALL of the contacts you want to include in the competition.
- 3 – The entries imported via ADIF will default to the lowest scoring category of Non-Novice, VFO controlled. You can edit this after the import but it would be much easier to add the following codes in each of your log entry comments instead. If you do so, your scoring will be automatic.

- **HB-X** Homebrew rig, crystal controlled
- **HB-V** Homebrew rig, VFO controlled
- **COM-X** Commercial rig, crystal controlled
- **COM-V** Commercial rig, VFO controlled
- **NON-X** Non-Novice rig, crystal controlled
- **NON-V** Non-Novice rig, VFO controlled (This is the default)

These codes can go anywhere in your QSO comment field.

- 4 – Be sure that your ADIF import includes at least the following fields:

- Call sign of the other station
- Band of the QSO
- Name of the other operator
- QSO Date
- QSO Time (not mandatory)
- RST Sent by you
- RST Received from other station
- State or Country of other station
- TX Power of your station

- 5 – **THIS IS IMPORTANT:** The ADIF log you will import is a text file containing field names that are enclosed in greater-than and less-than symbols. Example: '<BAND:3>80M'.

The problem currently is that the import process ERASES/IGNORES all text inside of those symbols so that '<BAND:3>80M' gets imported as '80M' and will completely fail.

You will be required to open the ADIF file in a text editor of your choice (like Notepad) and do a global search and replace to turn those symbols into curly-braces. '<' becomes '{' and '>' becomes '}'. If you do this properly, '<BAND:3>80M' will become '{BAND:3}80M'.

I am working to resolve this issue but the web server is not under my full control so I may not be able to fix it before the NRR 2017 contest.

Novice Rig Roundup (NRR) 2017 Contest Information

SKCC State/Province/Country (SPC) List

US states and Canadian provinces use a two-letter postal codes.

All other countries use three character codes.

THIS LIST WAS COPIED FROM The Straight Key Century Club's website at
http://www.skccgroup.com/display_spc_list.php
